KUALA LUMPUR, 23 OCTOBER 2013 - Bursa Malaysia Berhad (“Bursa Malaysia” or “the Exchange”) today announced a higher PATAMI of RM139.2 million for its nine months ended 30 September 2013 (“9M2013”), marking an increase of 21% from RM114.8 million, compared to the corresponding period last year. Bursa Malaysia’s performance for 9M2013 is due to a buoyant securities market in which there was a marked increase in foreign trade value¹ while the derivatives market saw a 16% increase in the average daily contracts traded to 44,160 contracts. Annualised return on equity recorded an increase of 24% to 23% from 18%. Cost to income ratio is at 45%.

Bursa Malaysia’s Chief Executive Officer Dato’ Tajuddin Atan said, “Bursa Malaysia’s total operating revenue was up 14% to RM335.9 million attributable largely to an increase in the securities trading revenue. For the period under review, trading revenue from the securities market registered double digit growth of 21% bringing the current total to RM166.9 million. The improved performance is derived from a higher average daily trading value (“ADV”) of RM2.1 billion for securities market, an increase of 20% from RM1.7 billion for the corresponding period, as a result of increased domestic² and foreign participation³. The interest and inflows is a reflection of Malaysia’s capital market resilience.”
