

SUSTAINABILITY & GOVERNANCE

FORGING THE WAY

Bursa Malaysia continues to set higher benchmarks for sustainable practices and good corporate governance. The launch of the Environmental, Social and Governance (ESG) Index in December 2014, the first internationally benchmarked index in Asia, provides a new value proposition and perspective of listed companies vis-a-vis their environmental and societal initiatives. Our improving Corporate Governance track record has been internationally endorsed, which places us in a strong position as we strive towards becoming ASEAN's Multinational Marketplace.
